

AQ-200

DESCRIPTION

AQ-200 is a combination acid-quat, cleaner-sanitizer that contains phosphoric acid and a 10% active, split-chain, quaternary ammonium based sanitizing compound. This product is a broad-spectrum sanitizer that is effective as a sanitizing acidified rinse that will provide residual protection. This product has a wide range of approvals and uses and is EPA and USDA registered.

BENEFITS

- A very broad-spectrum biocide. Rapid action
- Residual bacteriostatic activity for 2-3 days
- May be used on food preparation areas and food-processing equipment.
- Highly stable
- Economical: high dilution rate
- Highly acidic for effective acidified rinse in CIP applications

TYPICAL USE

A typical use of **AQ-200** is the application or circulation of a 200ppm solution of product through the proper circulation or spray equipment. A 200ppm solution is achieved using a 1 ounce per 4 gallons of water dilution (512:1). Allow at least 2 minutes of contact time and **DO NOT RINSE** after application.

NOTE: Please see product label for complete use list, instructions, and various use dilution rates.
