

COMPLETE+

DESCRIPTION:

COMPLETE+ is a chlorinated, high-foaming alkaline cleaner designed for foam, soak, or pressure cleaning applications in the food processing industries. **COMPLETE+** quickly and easily removes organic soils, especially protein films, stains, odors, and fatty deposits. **COMPLETE+** rinses quickly and easily and leaves no hard water films. **COMPLETE+** is SAFE to use on aluminum and painted surfaces and will not harm them under normal use conditions.

PROPERTIES

- pH of a 1% solution is about 11.0—11.5
- Color—A clear solution with a very slight yellow color
- Odor—strong chlorine
- Shelf-life—Chlorine will be stable for 90 days at room temperature. Higher temps will dissipate chlorine content faster
- Chlorinated—Rapidly and completely removes protein soils, stains, and odor issues
- Wetting agents—provide high, stable foam, easy rinsing, and good soil penetration and suspension
- Inhibited to reduce corrosion and aid in peptizing soils
- Rapidly soluble in water for ease in diluting and use consistency

HOW TO USE

Foam cleaning: Dilute **COMPLETE+** as follows:

Normal soils—use 2-3 ounces per gallon of water (or 16-24 mls per liter)

Heavy Soils—Use 3-6 ounces per gallon of water (or 24-48 mls per liter)

Manual cleaning—Use about 2-3 ounces per gallon of water (16-24 mls per liter).

NOTE: Always rinse with potable water.

SAFETY

COMPLETE+ contains sodium hypochlorite and is alkaline. DO NOT mix with acids or acid containing materials. Thoroughly read MSDS prior to use and ALWAYS wear ALL appropriate safety gear/PPE.

CONTAINERS

Available in 55-gallon/500# drums, totes, and bulk.
