

# DF-95

## Description:

**DF-95** is an opaque, bright-yellow liquid concentrated defoamer blend designed to reduce or eliminate foam in various caustic solutions or in areas where foam may be a problem.

**Typical properties:**

- Eliminates excess or undesired foam
- Cleaning solution temperature not critical for effectiveness
- No residual film
- Concentrated for economy
- Disperses instantly
- EXTREMELY powerful defoamer.
- FAST ACTING!

## Uses:

DF-95 was designed to be added directly to alkaline cleaning systems where excess foam is a problem. **DF-95** reduces or eliminates foam due to heavy soil loads, aeration, or extreme circulation and pumping conditions. Typical application examples are CIP cleaning of fermentors, evaporators, HTST, bottle-washing applications, or anywhere foam may be problematic.

## How to use:

Typical usage will vary depending on the severity of the foam problem; traditional use levels range between 0.25 to 1.5 ounces of **DF-95** per 100 gallons of cleaning solution. Some systems or applications may require higher use levels.

## Containers:

**DF-95** is available in 450# drums. Inquiries for larger containers welcome.
