

SANITIZER 200Z

DESCRIPTION

SANITIZER 200Z is a 10% active. Split-chain, quaternary ammonium based sanitizing compound. This product is a broad-spectrum sanitizer that is safe to use on all surfaces and is safe to use and handle by employees. It is a non-hazardous material which will provide residual protection after use. This product has a wide range of approvals and uses and is EPA and USDA registered.

BENEFITS

- A very broad-spectrum biocide.
- Safe for all surfaces and materials
- Rapid action
- Non-corrosive, colorless, non-toxic, minimal odor in concentrate and nearly odorless at use dilutions, non-staining
- Residual bacteriostatic activity for 2-3 days
- May be used on food preparation areas and food-processing equipment.
- Highly stable
- Economical: high dilution rate

TYPICAL USE

A typical use of **SANITIZER 200Z** is the application of a 200ppm solution of product after a thorough cleaning of all equipment and surfaces. Thoroughly wet all surfaces with the sanitizing solution and **DO NOT RINSE**. A 200ppm solution is obtained at a dilution of 1 ounce **SANITIZER 200Z** to 4 gallons of water (1:512).

NOTE: Please see product label for complete use list, instructions, and various use dilution rates.
