

EXCELON 210

DESCRIPTION

EXCELON 210 is a specially blended detergent/defoamer blend designed to improve the efficacy of caustic cleaning systems and control foam levels without the need for additional defoamers at the same time. **EXCELON 210** is an opaque solution with minimal to no odor.

REGULATORY INFORMATION

EXCELON 210 is comprised of materials found under the GRAS list of materials and components, and materials listed in the 2015 AAFCO publication acceptable for use in animal feeds. Also, this formulation contains a food-grade, kosher approved defoamer to aid in foam control and provide an elevated level of defoaming properties.

TYPICAL PROPERTIES

pH of neat solution - @ 6.0 to 8.0
Ultra-low foaming, non-ionic detergency
Added non-silicone, food-grade defoamer
Quick penetration & emulsification of soils
Fast and easy rinsing properties; save water
Good caustic and temperature stability
Biodegradable materials

BENEFITS

Reduce CIP caustic usage and requirements while simultaneously improving overall cleaning efficacy!
Reduce water usage by reducing cleaning & rinse time
Drastic foam reduction and control
Potentially save on antibiotic needs by improved cleaning!
Non-hazardous materials
Successfully used in fermentation plants across the country!

CONTAINERS

EXCELON 210 is available in drums, totes, and bulk quantities. Ask your local representative for details
