

## SMOKEHOUSE CLEANER

This product is specially formulated for cleaning soils found in smokehouses. Smokehouse Cleaner is ideal for use with any type of foam in equipment and can also be used to soak equipment and in pressure washing applications. This product contains potassium hydroxide and sodium hydroxide along with complex, high-foam surfactants. When used as directed; Smokehouse Cleaner will not harm any grade of stainless steel. This product contains no chlorine or phosphates.

### **Physical Properties (Typical)**

Appearance	Colorless liquid
Odor	Mild to none
pH (10% in water, wt/wt)	> 12
Melting Point	< 0°C
Freeze-Thaw Stability	Complete
Density	10.0 lbs/gal
Specific Gravity	1.20

### **DIRECTIONS**

This product removes food, carbon, and grease soils from multiple surfaces.

1. Dilute this product 2 to 4 ounces per gallon of water in foaming equipment reservoir.
2. Foam onto surface to be cleaned.
3. Let surface soak in foam for five to ten minutes.
4. Rinse with hot water.

Use 1 to 3 ounces of this product per gallon when applying with a pressure washer or for use as a soak solution.

This product does not contain any nonylphenol ethoxylates (NPEs) and therefore is better for the environment and faces less regulatory restrictions and environmental implications than similar NPE-containing products.
