Use:

EXTRACT-COMplete was designed for use in a low rate continuous addition system. Exact use dilution rates will vary. Suggested addition rates range from approximately 400ppm up to 750ppm for most applications. Adjust feed rate as necessary for your flow rate and system to achieve best individualized results.

Containers and Safety:

EXTRACT-COMplete is available in drums, totes, and bulk. In case of eye contact, flush with plenty of fresh water and seek medical attention if any irritation or redness develops. Some individuals may be more sensitive to product contact. Remove contact lenses immediately. To promote the best safety, handle with care and use appropriate PPE when working with or handling this material. Please have all employees and personnel thoroughly read the MSDS prior to using this product.
